

IRONCYCLEN®

LIQUID IRON SUPPLEMENT

A palatable liquid iron blood-building supplement for horses.

KEY BENEFITS/PROPERTIES

- Palatable molasses flavoured syrup
- Contains three soluble forms of iron together with the blood building co-factors copper and cobalt, which are essential for red blood cell and haemoglobin production.

MODE OF ACTION

Iron, Copper and Cobalt support the formation of haemoglobin, the oxygen carrying component of red blood cells, which transports oxygen from the lungs to the body's cells.

RECOMMENDED FOR

- All performance horses and horses in training
- Red blood cell production
- Haemoglobin formation
- Anaemia caused by worm infestation or haemorrhage
- Horses recovering from illness or infection
- Increasing (or improving) oxygen carrying capacity of the blood.

DOSAGE/ADMINISTRATION

Adult horses in training: 45 - 75 ml daily in feed.
Iron deficiency anaemia: 45 - 75 ml daily until anaemia corrected (usually 14 - 28 days) or as per veterinary advice.

INDICATIONS

- Treatment of iron deficiency anaemias in horses.
- Racing, training and other forms of hard exercise increase the requirement for iron.
- Working and breeding horses.

PRECAUTIONS

IRONCYCLEN®, as with all iron supplements, should not be given in the same feed as Vitamin E, as contact with iron may reduce vitamin E potency.

Check with horse racing authorities regarding use on race day.

WITHHOLDING PERIOD

Meat: Nil.

STORAGE

Store below 25°C.

PRESENTATION

1L, 5L and 10L packs.
