

FELIGEN[®] RCP

TRIVALENT MODIFIED LIVE FELINE VIRAL VACCINE

DESCRIPTION

Injectable vaccination that gives proven protection against the recognised core feline infectious diseases, Feline panleukopaenia (parvovirus), rhinotracheitis (herpes virus) and calicivirus.

KEY PROPERTIES AND BENEFITS

- Modified live viral vaccine which safely induces a strong and rapid immune response.
- High efficacy and safety.
- No added adjuvant.

COMPOSITION

Live attenuated: feline calicivirus, herpes virus (rhinotracheitis) and parvovirus (panleucopenia).

INDICATIONS

Vaccination of cats against calicivirus, rhinotracheitis and panleucopenia.

CONTRAINDICATIONS

- Do not vaccinate cats receiving corticosteroids.
- Vaccination of pregnant queens is not recommended.

DIRECTIONS FOR USE

- Only healthy cats with normal temperatures should be vaccinated.
- Use immediately after reconstitution with 1mL of suitable diluent (BP WFI) transferred aseptically.
- Primary vaccination in kittens from 8 weeks of age: Inject subcutaneously or intramuscularly 3 doses of vaccine at intervals of 1 month.
- Primary vaccination in cats 12 weeks of age and older: Inject subcutaneously or intramuscularly 2 doses of vaccine at an interval of 1 month.
- An annual booster is recommended.

Feligen[®] RCP is a Restricted Veterinary Medicine. Available only under Veterinary Authorisation. Registered Pursuant to the ACVM Act, 1997, No. A005021.

STORAGE

Store at 2 to 8°C. (Refrigerate. Do not freeze.) Protect from light.

PRESENTATION

10 single dose vials plus 10 1ml diluents (water for injection BP).
