

INDOREX® RANGE

PROTECTS THE HOME AGAINST FLEAS

DESCRIPTION

The Indorex® range targets fleas where they live and aids in the control of adult fleas in carpets and furnishings.

ACTIVE INGREDIENTS

- Pyriproxyfen
- Permethrin
- Piperonyl butoxide

KEY BENEFITS/PROPERTIES

- Provides up to 12 months protection from fleas, eggs and larvae in carpet and furnishings.
- Permethrin levels last for up to 10 days.
- Kills every stage of the flea life cycle and protects for 12 months.
- Penetrates carpets, bedding, couches and underneath furniture, to target fleas where they hide.

MODE OF ACTION

- **Pyriproxyfen:** an insect growth regulator that disrupts the flea life cycle for up to 12 months
- **Permethrin:** aids in the control of adult fleas in carpet, furnishings and bedding
- **Piperonyl butoxide:** prevents the breakdown of Permethrin and allows for longer action

DOSAGE / ADMINISTRATION

One Indorex® Fogger can treat an area of 40m². Treatment with Indorex® Target spray should be considered for "hot spots" of infestation.

INDICATIONS

- Environmental control of fleas
- Flea infestations

CONTRAINDICATIONS/PRECAUTIONS

- Do not use directly on animals.
- Deemed safe to use as long as all people and animals (including fish and birds) are removed from the immediate environment for 3 hours after treatment.

STORAGE

Store at room temperature away from sunlight, children and animals. Do not expose to temperatures exceeding 50°C.

PRESENTATION

Indorex® Target Spray and Indorex® Fogger are available individually, or as a house pack containing 1 Indorex® Target Spray and 5 Indorex® Foggars.
