

SEBOLYTIC™

SHAMPOO FOR DOGS WITH SMELLY, GREASY OR DRY, SCALY SKIN

DESCRIPTION

For the treatment of greasy, scaly and smelly skin in dogs and cats.

ACTIVE INGREDIENTS

- Piroctone olamine: Antifungal
- Pyridoxine HCL (vitamin B6): Essential for maintaining healthy skin
- Zinc gluconate: Antiseptic and anti-inflammatory
- Sodium salicylate: Anti-inflammatory, keratolytic and keratoplastic.
- Narrow-leaved tea-tree (*Melaleuca alternifolia*) leaf oil: Antiseptic and anti-inflammatory
- Glycotechnology™ (L-rhamnose, D-galactose, D-mannose): Substantially reduces bacterial and yeast adhesion to the skin.
- Defensin™ Technology (*Peumus boldus* leaf extract and *Filipendula ulmaria* extract): Upregulates the skin's endogenous defence system to regulate microbial flora.
- Lauryl glucoside: Surfactant for use as a foaming agent, conditioner and emulsifier with good dermatological compatibility. Lauryl glucoside is biodegradable and made from oils and glucose both derived from renewable plant sources.

MODE OF ACTION

- Softens and removes skin crusts and scales.
- Removes excess oils.
- Neutralises unpleasant smells.
- Has a micro-organism anti-adhesive effect.
- Stimulates the skin's natural microbial defence.

DOSAGE / ADMINISTRATION

1. Wet coat thoroughly with lukewarm water.
2. Apply a thin line of shampoo along the back line.
3. Massage into wet hair and lather.
4. Allow the lather to remain on the skin for 3 to 10 minutes before rinsing.
5. Rinse well with lukewarm water to ensure no product remains.

Use 2-3 times weekly for 3 weeks and then as recommended by the veterinarian.

PRESENTATION

200ml bottle.

STORAGE

Store below 30°C (room temperature).
