

WORMICIDE TAPE

TAPEWORM TREATMENT FOR DOGS

Wormicide Tape is a tablet that treats tapeworm in dogs.

ACTIVE INGREDIENTS

- Praziquantel 100mg

KEY BENEFITS/PROPERTIES

- A higher concentration per tablet enables easy dosing for working dogs.
- Single active targeting tapeworm.
- Ideal for rural dog runs for monthly dosing in between other worm treatments.
- Important for ensuring protection of our New Zealand livestock.
- Wide safety margin.

MODE OF ACTION

Praziquantel:

- Kills tapeworms.
- Causes integumental disintegration and spasms leading to death.

INDICATIONS

For the treatment of all tapeworm, including Hydatids, in dogs and puppies.

CONTRAINDICATIONS

Known sensitivities to Praziquantel.

DOSAGE / ADMINISTRATION

Administer directly by mouth, or crushed and added to food. Regular dosing is essential for worm control.

Recommended treatment protocols:

Dogs in rural areas (possible contact with sheep and cattle): treat every 4 - 6 weeks.

Dogs visiting rural areas: treat within 4 weeks before visiting a rural area. Dogs kept in urban areas: if infestation is detected, treat every 4 weeks for 3 months. For routine prevention, treat every 3 to 6 months.

STORAGE

Store below 30°C.

PRESENTATION

Bottle of 100 tablets.
